- **LYE** Globe Silent Check Valve is the valve of choice in applications where silent operation is of major concern. Its short linear stroke and spring return action automatically closes the disc at zero flow, which prevents flow reversal and water hammer.
- Guided spring loaded disc with drop tight closure.
- Designed for a minimum open area equal to 110% of the pipe size.
- Fusion bonded epoxy coating is standard.
- Can be used in both horizontal and vertical positions.
